Education

National University of Computer and Emerging Sciences

Peshawar, Pakistan

Bachelor of Science in Computer Science

Class of 2024

Aspire College

Pattoki, Pakistan

Intermediate in Computer Science

Class of 2022

Projects

Digital Clone AI Chatbot | *FastAPI, Next.js, Supabase, RAG*

- Production-ready AI chatbot simulating Franz Kafka using multi-tenant RAG, 3-tier memory, and semantic search over 4,000+ text chunks.
- Built with FastAPI backend, Supabase pgvector, Llama 3 via Groq, and Gemini embeddings, with strict token budgeting and a Next.js chat interface.

EduIG-Pipeline | *Python, Playwright, Flask, SQLite*

- Production-ready Instagram data extraction pipeline using cookie-based authentication to bypass bot detection and fetch exact follower, engagement, and post metrics for research.
- Includes a Flask + Tailwind dashboard (PWA) with Chart.js visualizations, CSV/JSON export, SQLite storage, and 150+ automated tests ensuring 80%+ coverage and data integrity.

Technical Skills

Programming Languages: C, C++, Python, JavaScript

Web Technologies: HTML, CSS, React, Next.js

Tools & Frameworks: Playwright, Flask, Git, GitHub, Linux

Databases: Supabase, Convex, My SQL

Experience & Leadership

Research & Content Lead, AWS Student Builder Group FAST PWR

Sep 2025 – Present

- Led technical research and content creation for AWS-focused workshops, talks, and learning resources for the Student Builder community at PWR.

Web Development Co-Lead, IEEE Student Branch FAST PWR

Oct 2025 – Present

- Advised on website design decisions, contributing feedback on layout, UI, and user experience for the official branch website.

Achievements

Website Development: Created websites for AWS Student Builder Group, personal portfolio, and a photographer gallery using modern web technologies.

Open Source Projects: Developed and published Python-based Instagram scraping tools on GitHub with production-grade features including automated testing and 80%+ code coverage.
